Sundowner Expands to Accommodate Toy Hauler and Living Quarter Growth

Coleman, OK --- Through the first half of 2017, Sundowner Trailers has seen their Santa Fe and Horizon models continue to lead the way for horse trailer living quarters sales, as their innovative toy haulers have quickly become top sellers as well. Consumer demand for lower profile and load height, quality aluminum construction, plus free customization, numerous floor plans and high quality interiors have all contributed to the Sundowner Pro-Grade Toy Hauler's popularity.

"We have seen unprecedented growth in our toy hauler living quarters in the last year," said Stephanie Griffin, Sundowner Trailers' Living Quarters Design and Development Director. "It's a very exciting time for Sundowner as we discover and pursue new markets."

Sundowner has also seen a resurgence in large custom living quarters purchases in both horse trailers and toy haulers. In order to meet increasing demand and maintain good lead times, Sundowner is currently in the middle of an expansion project to increase their living quarter facility and production with an additional 30,000 sq feet.

"We strive to offer beautiful interiors at competitive prices with endless options," Griffin said.

A top trailer manufacturer for over 40 years, Sundowner now offers a full range of horse, livestock, cargo, open utility, toy and car haulers including an exciting Motorsports lineup. They are each covered by a single source 3 year hitch to bumper, 8 year structural warranty. Learn more about their living quarters including toy haulers and full line up of trailers at www.sundownertrailer.com, email info@sundownertrailers.net or call 800-438-4294.
